DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 1, 10, 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 00/72540 Ariyavistakul et al. cited by the applicant.

Claims 1, 10, 19, Ariyavistakul discloses a system for demodulating received Complementary Code Key (CCK) encoded symbols (chips). In figure 8 Ariyavistakul discloses a system comprising a decision feedback equalizer (DFE) structure including soft decision (soft dec.), feed back filter (FBF), a feed forward filter (FFF), and an adder, for receiving and equalizing encoded symbols and providing an output comprising an estimation of said received symbols. Ariyavistakul further discloses a CCK decoder (CCK DEMOD) means embedded in the feedback path and operating in conjunction with a feedback filter therein for decoding said chips. Ariyavistakul further discloses the demodulating of the chips based on intermediate DFE outputs including those chips

corresponding to previous symbols (p. 6, lines 9-28, p. 8, line 3). Figure 3 illustrates the use of chips from the current and the previous symbol.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2-9, 11-18, 20-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 2, 11, 20, cite the limitation, "wherein the decoding and equalization are performed on a block of eight 8 chips \tilde{c}_{k+j} for CCK modes." However, the term \tilde{c}_{k+j} , is not properly defined within the claim.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Erin M. File whose telephone number is (571)272-6040.
